ABOUT

I am a bilingual software engineer with a strong foundation in problem-solving and a passion for delivering robust solutions. Leveraging a background in customer service to effectively collaborate with diverse teams. Known for exceptional social skills, patience and adaptability.

RELEVANT EXPERIENCE

Vital Guidance – Health App | Solo Project - MERN Full Stack

- I spearheaded the design and development of a comprehensive MERN stack health application, seamlessly integrating the Edamam recipe API. This platform empowers users to access a diverse range of recipes while providing robust functionality to track 12 key life aspects, including current habits and future goals.

Watch Party – Movie Social Media App | Team Project – Backend Python Development

- Our team collaboratively developed an application enabling users to curate a personalized Watch Party, where they can save favorite movies and share comments and reviews. Leveraging an API integration, we facilitated seamless lookup and saving of movies to each user's Watch Party.

My Reads –Book Tracking App | Solo Project – Backend Javascript Development

- Driven by a passion for literature, I developed an application designed for avid readers. This app enables users to log books by entering details such as title, author, and reading dates. Additionally, users can write personalized synopses for future reference and assign ratings to each book.

Concentration – Memory Game | Solo Project – Backend Javascript Development

- I designed and implemented an engaging memory game using JavaScript, where users can enjoy playing within a time limit challenge.

EDUCATION

General Assembly, Marietta, GA (remote)

Feb – May 2024

I

gained practical insights into the role of a Software Engineer through independent and collaborative project development. Utilizing technologies such as JavaScript, Python, Django, and React, I successfully delivered various projects.
